Green IT Welcomes New Full Stack Developer

PHILADELPHIA, Pennsylvania - Green IT welcomes Bhob Rainey to its team as a Full Stack Developer. His responsibilities touch many parts of our software, including interactivity, UI, logic, and database.

Bhob's initial assignments encompass leading an Angular refactor of the front end, developing stability enhancements, and introducing new features, including an Environment, Health, and Safety module and a dashboard for tracking team resources.

Bhob arrives at Green IT with extensive software development and back end architecture experience, having embraced contemporary frameworks like Angular and React. He has developed social networks, e-commerce sites, content management systems, and analytic microservices, as well as a host of cutting edge tools for creatives.

In addition to his passion for technology, Bhob is an accomplished musician and sound designer. Bhob and his wife Ginger have been living in Philadelphia for 5 years and share their home with 2 guinea pigs.

Bhob writes, "I am looking forward to developing innovative applications for the renewable energy sector."

"Bhob is a tremendous engineer and leader," offers Green IT CEO Andrew Eisenberg. "We are grateful to have his deep experience across the stack. We anticipate that Bhob's creative problem-solving skills will be essential to present and future Green IT endeavors."

Welcome to the team, Bhob!

About Green IT

Green IT Energy Applications™ provides software solutions and comprehensive IT services for the renewable energy industry. Since 2002, Green IT has pioneered technology-driven strategies that optimize all stages within the lifecycle of an asset, from origination through planning, execution, operations, and asset management. Green IT's Smart Software catalog combined with our team's industry-specific expertise equip us to add value to assets of any size or class.
